

Sub A²

I claim:

1. A system for on-line viewing of an article on another structure, comprising:
2. on-line viewer site; and
3. a computer-driven web-linking engine configured and arranged to create an item from
4. image-data corresponding to a colored article selected by an on-line viewer from the on-line
5. viewer site with an image of a colored structure selected by the on-line viewer, the computer-
6. driven web-linking engine adapted to indicate whether the colored article and the colored
7. structure satisfy a color-matching criterion.

1. 2. The system of claim 1, wherein the computer-driven web-linking engine is further
2. configured and arranged to create the item using a data set that includes a color identification
3. code provided for the color of the article and a color identification code provided for the color of
4. the structure.

1. 3. The system of claim 3, wherein the data set further includes an article size code.

1. 4. The system of claim 3, wherein the data set further includes an article style code.

1. 5. The system of claim 1, further including a computer arrangement generating the image-
2. data corresponding to the colored article with the color identification code provided for the color
3. of the article.

1. 6. A system for on-line viewing of an article on another structure, comprising:
2. means for viewing images at a video display site; and
3. web-linking means for creating an item from image-data corresponding to a colored article
4. selected by an on-line viewer from the on-line viewer site with an image of a colored structure
5. selected by the on-line viewer, the computer-driven web-linking engine adapted to indicate
6. whether the colored article and the colored structure satisfy a color-matching criterion.

Sub A³

- 1 7. A method for on-line viewing of an article on another structure, comprising:
 - 2 viewing images at a video display site; and
 - 3 creating an item from image-data corresponding to a colored article selected by an on-line viewer
 - 4 from the on-line viewer site with an image of a colored structure selected by the on-line viewer,
 - 5 and indicating whether the colored article and the colored structure satisfy a color-matching
 - 6 criterion.

- 1 8. A method for on-line viewing of an article on another structure, comprising:
 - 2 creating an item from image-data corresponding to a colored article selected by an on-line viewer
 - 3 from an on-line viewer site with an image of a colored structure selected by an on-line viewer,
 - 4 and indicating whether the colored article and the colored structure satisfy a color-matching
 - 5 criterion.

- 1 9. The method of claim 8, further including creating the item using a data set that includes a
- 2 color identification code provided for the color of the article and a color identification code
- 3 provided for the color of the structure.

- 1 10. The method of claim 8, wherein the data set further includes an article size code.

- 1 11. The method of claim 8, wherein the data set further includes an article style code.

- 1 12. The method of claim 8, further including generating the image-data corresponding to the
- 2 colored article with the color identification code provided for the color of the article.
